IMPROVING WORKING LIVES

AUSTRALIAN CATALOGUE

Bata Industrials Premium
Safety Footwear Range

**ENGINEERED
FOR COMFORT**

MANUFACTURING IN AUSTRALIA SINCE 1961

Our History

Founded in 1894, The Bata Shoe Organization is one of the world’s leading manufacturers and retailers of quality footwear. With over 30,000 employees, 24 production facilities, 5,000 international retail stores and a presence in over 70 countries.

The company was first registered in the town of Zlin Czechoslovakia, from humble beginnings the small family business expanded rapidly under the vision and guidance of founder Thomas Bata. Thomas was a ninth generation shoemaker determined to become a manufacturer who could provide customers with value for their money.

Bata became an international business in the first half of the 20th century and by the second half of the century had established a true global footprint (production in Australia had commenced in 1961). A progressive and market leading pioneer of the modern footwear industry Bata is now an iconic brand recognised all around the world.

Bata Industrials In Australia

Bata Shoe Company Pty Ltd was established in Australia 1961. Production commenced in Mornington, Victoria in 1981, and remains our Head Office location today. The Australian company is registered as a quality endorsed company complying with ISO 9001 and AS/NZS 2210.3 and is proud to be part of the world wide organization. With a strong industrial focus, the company manufactures and wholesales over a million pairs of footwear each year through its industrial and wholesale retail business streams.

A working relationship between the Bata Australian and European industrial companies was the platform for the development of an association between the specialised industrial companies within the organization. In 2004 the first meeting of the Bata Industrials World Wide Group was held at Bata Best in the Netherlands. Involving companies from South America, South Africa, Europe, Australia and New Zealand, the enormous potential for the group to synergize information, product development, manufacturing, and sourcing became apparent. The combined technical and R&D resources of the group have lead to a cross pollination of ideas and the capacity for production development has never been stronger. This is epitomized by the development and re-structuring of the Bata Industrials ranges in Australia between 2005 and 2007.

FOOTWEAR FEATURE ICONS

Use the symbols displayed on this page to see each boot's performance characteristics. By referring to these icons as you read through this catalogue, you'll see the special features for each different style of boot. Use this information to help determine which Bata Industrials style is suitable to your needs. You will also notice that many of our boots cater for specialised industry specific requirements. Please read the product descriptions closely or visit us online at www.bataindustrials.com.au for more information.

SOLE FEATURES

SLIP RESISTANT

Tested to meet the Australian/New Zealand standard for slip resistance.

FLEXIBLE MIDSOLE

A soft cushioned midsole providing comfort, flexibility and a high level impact absorption.

TUNNEL SYSTEM®

This design ensures that the shoe will absorb shock from impact, thus relieving pressure on your joints.

DURABLE HEAT RESISTANT PU OUTSOLE

Resistant to oil, acid, abrasion & heat up to 130°C.

DURABLE HEAT RESISTANT TPU OUTSOLE

Resistant to oil, acid, abrasion & heat up to 130°C.

HEAT RESISTANT RUBBER OUTSOLE

Durable rubber outsole can withstand extremely high temperatures of up to 300°C.

SLIP RESISTANT RUBBER OUTSOLE

Certified tread pattern designed and tested to exceed the safety standard for slip resistance.

COMFORT FEATURES

PU COMFORT FOOTBED

For increased underfoot cushioning performance.

LAMELLA IMPACT ZONE

Lamella mushroom absorbs impact and dissipates energy to help protect your feet, legs and lower back.

D30® IMPACT PROTECTION

For enhanced comfort & impact absorption to help soften the weight of working on your feet all day.

LIGHTWEIGHT EVA MIDSOLE

Soft cushioned midsole that generates outstanding comfort and is super lightweight.

ORTHOLITE INSOLE

Provides superior cushioning, unmatched comfort, breathability and durability.

PROTECTION FEATURES

STEEL TOE CAP

Steel toe cap offers protection against injuries and can withstand a force of up to 200 joules.

ALLOY TOE CAP

Lightweight toe cap offers protection against injuries and can withstand a force of up to 200 joules.

COMPOSITE TOE CAP

Non metal toe cap offers protection against injuries and can withstand a force of up to 200 joules.

STEEL MIDSOLE

Protects the foot against sharp objects penetrating through the sole.

COMPOSITE MIDSOLE

Non metal midsole that protects the foot against sharp objects penetrating through the sole.

SCUFF CAP PROTECTION

For added toe scuff and abrasion protection to prolong the life of the boot.

ELECTRIC HAZARD PROTECTION

Designed to significantly minimise the flow electricity to the ground, reducing the possibility of electrocution.

ANTISTATIC

Minimises the amount of static electricity build-up on your body.

BOOT UPPER FEATURES

LEATHER UPPER

High quality leather for added safety and durability.

KPU UPPER

High resistant material to help prevent tearing and abrasion.

WATER RESISTANT

Resistant to water penetrating the inside of the boot.

MICROFIBER UPPER

Water resistant and easy to clean with a leather look finish.

SPECIAL FEATURES

3M™ SCOTCHGARD™ PROTECTOR

Added leather protection from oil and water and also makes cleaning easier.

3M™ THINSULATE™ INSULATION

Fine microfibers help trap air and block body radiant heat loss, making it an efficient insulator.

NOMEX STITCHING

Sewing thread that is made from heat and fire retardant meta-aramid fiber.

METAL FREE

Made with composite components and a great choice for workers where metal detection is present.

AIRPORT FRIENDLY

Ideal for travelling through metal detection portals and airport security.

LADIES FITTING

Designed specifically to fit a ladies foot. Available only in ladies sizes.

NON SAFETY

Boot with no safety toe cap, and is a great option for when not restricted to wearing safety footwear.

AEGUS ODOUR CONTROL LINING

Technology by Microban that controls the bacteria and fungi that causes odours, stains and product deterioration within the shoe.

OIL & ACID RESISTANT UPPER

Upper is resistant to oil & acid substances.

ZIP SIDED

Allows you to quickly slip in and out of your boots without having to stop and use the laces.

QUICK RELEASE

Features BOA® fastening system for a quick release, glove like fit.

COMMON FEATURES

For more technical info, visit www.bataindustrials.com.au to download the data spec sheet.

Standard Certification

AS/NZS 2210.3:2009

3M™ Scotchgard™ protector
Premium leather uppers with added leather protection from oil and water and also makes cleaning easier.

Nomex stitching
Heat and fire retardant stitching.

Comfort footbed
For increased cushioning performance.

Steel safety toe cap
Capable of resisting a drop force of 200 Joules to offer premium protection for your toes.

D30® Heel cushion insert
Receives a wave of initial impact and displaces the shockwaves and channels the energy to encourage movement.

Durable rubber outsole
Abrasion & heat resistant to 300°C.

Electric hazard protection
Designed to significantly minimise the flow electricity to the ground, reducing the possibility of electrocution.

PROTECTED BY D30

OUTSOLE TECHNOLOGY

- Dual density PU / Rubber sole
- Flex grooves in forefoot increase flexibility and minimize fatigue
- Rubber outsole is heat resistant to 300°C
- Added ladder & step grip breaks
- Slip resistant tread for maximum grip
- Larger profile channels for enhanced liquid dispersal
- Flex grooves in heel increase flexibility and minimize fatigue

WHAT IS D30?

Bata Industrials Helix range is protected by D30. Nothing protects better than D30.

D30 material offers the thinnest and most advanced protection against impact. Giving both long-term cushioning and shock attenuation. This means that the faster the impact, the greater the resistance to the force.

Try a pair of **Helix Boots** and if you're not completely satisfied with the comfort, simply return the boots to the place of purchase within 30 days of the date of purchase for an exchange or refund.

Bata Industrial's entire range is warrantied for six (6) months from the date of purchase against defective workmanship and/or materials when used under normal conditions for the purpose intended for the particular boot.

DEEP COMFORT

COMMON FEATURES

For more technical info, visit www.bataindustrials.com.au to download the data spec sheet.

Standard Certification

AS/NZS 2210.3:2009

High quality leather upper

High quality leather for added safety and durability.

PU comfort footbed

For increased underfoot cushioning performance.

Steel safety toe cap

Capable of resisting a drop force of 200 Joules to offer premium protection for your toes.

Toe scuff protection

For added toe scuff and abrasion protection to prolong the life of the boot.

Durable rubber outsole

Resistant to oil, acid, abrasion & heat up to 300°C.

YKK zip side

Durable zip side for added ease of fitting.

Antistatic protection

Minimises the amount of static electricity build up on your body.

Lamella impact zone

Lamella mushroom in the forefoot and heel absorbs shock from impact and dissipates energy to help protect your feet, legs and lower back.

OUTSOLE TECHNOLOGY

Added grip at toe strike

Dual density PU / Rubber sole

Lamella impact absorption zone

Slip resistant tread for maximum grip

Multi-Directional channels for enhanced liquid dispersal

Added ladder & step grip breaks

Rubber outsole is heat resistant to 300°C

Lamella impact absorption zone

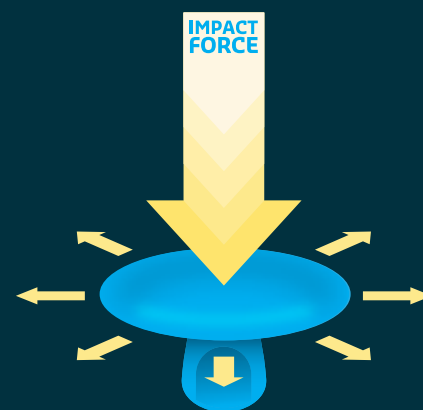

Added grip at heel strike

C.T.S

COMFORT TECHNOLOGY SYSTEM HOW DOES IT WORK?

1. Lamella zones are impacted by shock force

2. Lamella mushrooms absorb and dissipate impact energy

These impact zones provide you with a more comfortable work boot that will aid and protect your feet, legs and lower back.

This simple yet unique idea is taking comfort in safety footwear to the ultimate level. The Deep Comfort mushroom inserts are based on shapes provided to us by nature. The lamella absorption impact zones are the most effective means of increasing the ratio of surface area to surface mass, supplying ultimate impact distribution.

Bata Industrial's entire range is warrantied for six (6) months from the date of purchase against defective workmanship and/or materials when used under normal conditions for the purpose intended for the particular boot.

NATURALS

COMMON FEATURES

For more technical info, visit www.bataindustrials.com.au to download the data spec sheet.

High Quality Leather Upper

High quality leather for added safety and durability.

Standard Certification

AS/NZS 2210.3:2009

Antistatic protection

Minimises the amount of static electricity build up on your body.

Steel safety toe cap

Capable of resisting a drop force of 200 Joules to offer premium protection for your toes.

Durable PU outsole

Resistant to oil, acid, abrasion & heat up to 130°C.

PU Comfort footbed

For increased underfoot cushioning performance.

Tunnel System®

Concave design in the heel of the outsole that absorbs shock from impact, thus relieving pressure on the joints.

OUTSOLE TECHNOLOGY

- Added grip at toe strike
- Dual density PU / PU sole
- Flex grooves in forefoot increase flexibility and minimize fatigue
- Slip resistant tread for maximum grip
- Multi-Directional channels for enhanced liquid dispersal
- Added ladder & step grip breaks
- PU outsole is heat resistant to 130°C
- Tunnel System in heel for energy return
- Added grip at heel strike

TUNNEL SYSTEM

Bata Industrials Naturals collection has evolved, featuring an updated sole design and premium styling.

The new sole design includes an enhanced tunnel system to increase comfort and reduce strain-related injury and fatigue.

The tunnel system is a lightweight concave heel cushioning system that dissipates heel-strike impact forces.

AUSTRALIAN MADE PVC GUMBOOTS

Bata gumboots are proudly manufactured at our Mornington, Victoria factory and have been worn by Australians for decades. Whether for general use in the yard or garden or simply when it's wet and wild outside, Bata gumboots will keep you dry, safe and comfortable.

Bata Utility gumboots are synonymous with Australian industry and are widely used across a variety of applications. The Utility design is a favourite in the workplace. It is reinforced at the heel, ankle and shin and is both durable and flexible. Channelling in the sole allows for improved liquid dispersal and slip resistance.

Our Jobmaster II gumboots are used widely throughout food processing and associated industries. With a specification well suited to fisheries, meat and poultry processing. Jobmaster II gumboots are made from PVC that has been specifically formulated for the correct work application. Fully lined with reinforced uppers and a slip resistant sole design Jobmaster II gumboots provide great comfort for the longest of shifts.

With a revolutionary new sole design that is durable and oil & acid resistant Jobmaster III provides surety under foot and excellent multi directional slip resistance. Comfortable for the longest shifts, Jobmaster III is destined to become a firm favourite across Australian industry, just like its hard working and hard wearing predecessors.

Recommended for use in the following industries;

BATA'S REACH IS WORLDWIDE; ITS PRESENCE IS LOCAL.

Bata Industrials was founded in the 1970's in response to a specific demand from the market for footwear for professionals. Since then, Bata Industrials has evolved to become a designer, producer and marketer of safety footwear and socks, exclusively targeting the professional end user markets.

Bata's reach worldwide; its presence is local. Our novel international

manufacturing structure allows Bata facilities around the globe to respond to the unique needs and wants of local customers. As a result, Bata is honored to be a local company in every country it serves. Bata continues to be guided by the same core principle it has followed for over one hundred years; to know its customers and to create the best possible products to meet their needs.

Today, Bata Industrials is one of the world's largest manufacturers of this type of footwear, and the only one that is truly a global player. With offices in the Netherlands, Chile, Mexico, South Africa, Kenya, India, China, Singapore, Australia and New Zealand. Bata Industrials serves customer markets on virtually every continent.

30 DAY COMFORT GUARANTEE

Purchase any pair of **Bata Industrial** boots from the **Helix**, **Professionals**, **SportMates** or **Bickz** range and if you're not completely satisfied with the comfort, simply return the boots to the place of purchase within 30 days of the date of purchase for an exchange or refund.

To make a claim under this guarantee, you must return the purchased footwear at your own cost to the place of purchase. Along with your original receipt within 30 days from the date of purchase. Provided the footwear is not damaged or misused you may choose between a full refund or an exchange up to the original purchase price of the footwear as set out on the purchase receipt.

6 MONTH MANUFACTURERS WARRANTY

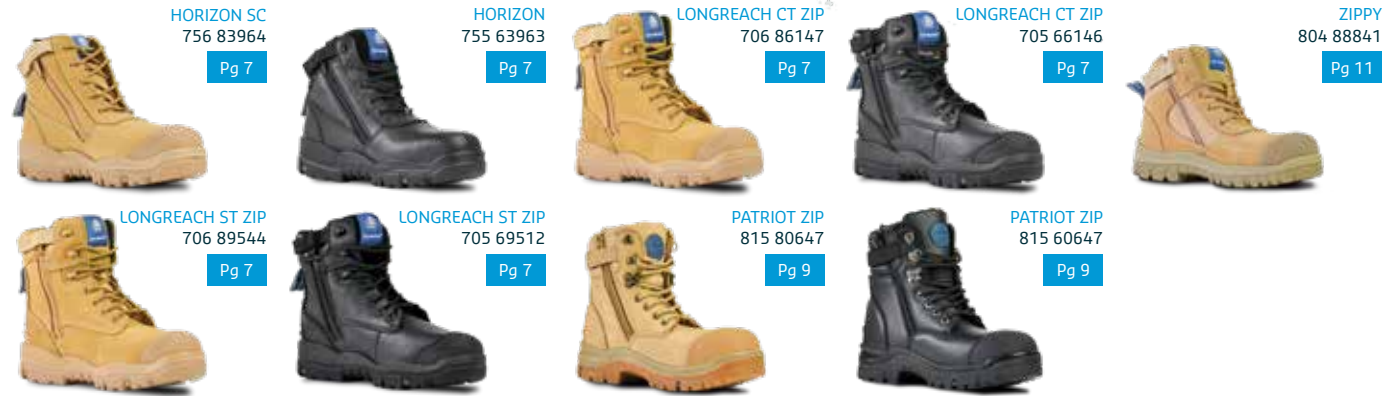

Bata Industrial's entire range is warranted for six (6) months from the date of purchase against defective workmanship and/or materials when used under normal conditions for the purpose intended for the particular boot.

The warranty will become void by the discretion of Bata Industrials if the product has been misused or subjected to excessive wear and tear including exposure to chemicals, cement, lime or heat if the footwear has not been designed for these environments.

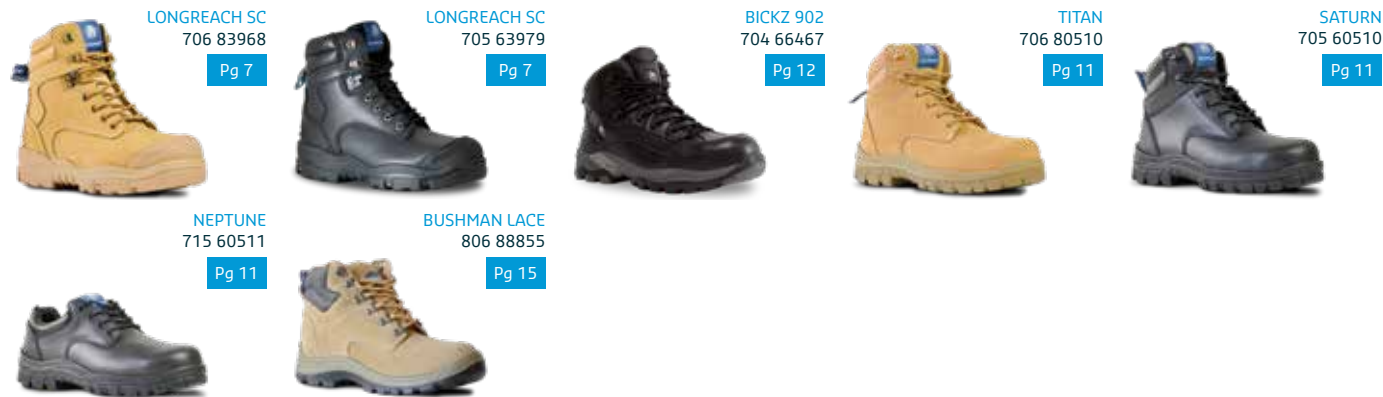

To claim the purchaser must return the footwear and provide proof of purchase to the place of purchase. The footwear will then be returned to Bata Industrials for inspection. If found defective the footwear will either be repaired and returned where possible, otherwise a replacement pair will be provided by Bata Industrials.
