TAILORED *FOR YOUR* ***VISION***

INNOVATIVE **VISION**

TAILORED FOR YOUR VISION

TAILORED FOR YOUR VISION, a new message that shows that we have always focused **exclusively on eye protection** and that **innovation** is at the heart of our developments to meet the high demand of our users.

Because we are eye protection specialists, we propose a **complete range of spectacles, goggles and face shields** adapted to every situation, a **range of quality prescription lenses** and a **Civil protection and Defence** range for the military, customs, police... and shooting sports.

We always go the extra mile to propose new eye protection for specific uses or environments. Check them out in **our new catalogue**. **It is more practical**, has clearer product segmentation and makes it possible to easily identify our flagship products and new technology: **new products** for all budgets, the extension of our solar and polarising solutions (because the sun, light and UVs are also an everyday risk).

Tailored for your vision, is also the bespoke creation of **two new goggle versions for industry and healthcare**, models you can customise **to your colours and brands** and a **new on demand offer to develop special products**.

We are by your side everyday to help you make the right choices and provide solutions to your issues. Don't hesitate to call on our services for **on site training**.

Excellent protection, an **attractive design**, a **reactive and involved team**, is more than ever the Bollé Safety signature.

BOLLÉ SAFETY
THE EYEWEAR SPECIALIST

OVER 130 YEARS OF INNOVATION

OVER THE YEARS BOLLÉ HAS BECOME A GLOBAL BRAND

Although initially benefiting from the Bollé brand image, year after year, Bollé Safety has developed its own distribution network and won its independence. Today, Bollé Safety is distributed in over 90 countries and over 15 million workers wear protective eyewear bearing the Bollé Safety signature. A remarkable sports-protection synergy!

**ANDY
BROWN**

Safety and well-being manager at BACHY SOLETANCHE LTD on the VINCI Construction group major: THAMES TIDEWAY PROJECT

The Thames Tideway programme is a project to transfer and store waste water and rainwater in central London, i.e. 32 kilometres of tunnels to increase existing network capacity. Begun in 2016, it is scheduled for completion in 2022. 500 to 750 people work on this project.

You have been loyal to Bollé Safety since 2016 to protect your teams, what were your selection criteria for the Thames Tideway project?

I started with a field test using different brands of protective spectacles: RUSH+ from Bollé Safety but also Uvex and Riley. Steve L., my contact at Bollé Safety, came on site to give training. Just handing over a pair of spectacles isn't enough, if you want workers to wear them, you need to explain the product's characteristics and how it works, you need to show them how the product adapts to varying morphology (head size, shape of the nose, etc.). He also demonstrated the effectiveness of the PLATINUM® anti-fog coating.

Which characteristics set Bollé Safety apart from the other players on the market?

Glass quality is very important and the feedback from users in the field was unanimous on the RUSH+ model for its comfort, its wrap-around feature, the flexibility of the temples and the bridge. RUSH+ meets all these criteria.

When you wear eye protection 8 to 9 hours every day, comfort is essential. The model is very adaptable to different facial morphology.

We also use the retainer strap on that model, as well as the cases and cleaning wipes. Accessories are important too!

WHY DO THEY PREFER BOLLÉ SAFETY?

COMFORT

CUSTOMER SERVICE

**JEAN-LOUIS
CASTELLANO**

**Safety Manager
at AIRBUS HELICOPTERS**

Airbus helicopters is the leading manufacturer of civilian helicopters in the world and one of the main manufacturers of military helicopters. It employs around 20,000 people globally.

Since when have you been working with Bollé Safety?

I have been in charge of safety at Airbus Helicopters at Marignane and Paris-le-Bourget since 2013. Bollé Safety products were already used by staff when I arrived. We have been working with the brand for over 10 years.

Why did you decide to continue working with them?

They have quality products and the feedback from the field has always been positive. Just last year, new products became popular, in particular the COBRA.

For prescription glasses, I appreciate the simplicity and efficiency of the web shop.

I have good visibility of my orders and of all the people who are kitted out. So even for prescription glasses, the circuit is very simple and I save time because I no longer need to contact the opticians to get the information I need. I have a clear and reliable real time view. Finally, I greatly appreciate the sales contact: available, reactive and highly professional because they are attentive to solving every issue.

What criteria did you use to select Bollé Safety?

- If PPE is ugly people don't wear it. So appearance is important.
- Lightness, as protection must be worn for 8h.
- How well the product stays on the head, a some jobs require leaning or crouching positions.
- Strength, because users are not always very careful.

What differentiates Bollé Safety from the other players on the market?

The "BOLLÉ" name has an impact on users. It's a trusted brand, a reference that infers professional quality.

* Airbus Helicopters employees.

**PATRICK
DEKENS**

**PPE Safety advisor - for 38 years at AUDI Belgium.
3000 employees of which 500 wear protective
glasses.**

You have been a loyal Bollé Safety PPE partner for your employee protection for over 10 years, what are your main reasons?

First of all, I'm very happy with our relationship with Nicolas V. whose role is to support and advise us. He's friendly and reactive, thanks to him there are never any problems, just solutions!

As for the products, the range is very broad and there is a wide variety of lens colours.

Audi has selected 4 models that are suitable for everyone and I'm still impressed by PLATINUM®. It is a really very effective anti-fog coating.

I also appreciate the comfort of the different models.

How would you describe the relationship with Bollé Safety ?

Bollé Safety is a great partner for audits, user tests, for better adoption by employees.

I trust the products and the brand.

In your opinion, how does Bollé Safety stand out from the competition?

Bollé Safety's main strengths? Service and product quality and comfort. In 12 years I have never had the slightest problem!

Bollé Safety is an excellent supplier.

With 500 people wearing eye protection, I also appreciate Bollé Safety's reactivity in answering questions and finding solutions.

Bollé Safety is a known brand that innovates all the time, for example by offering the possibility of customising equipment using our brand and colours!

Finally, Bollé Safety is more competitive than Uvex. All that makes the difference.

“ **BOLLÉ SAFETY GLASSES PROVIDE EXCELLENT PROTECTION
IN DUSTY ENVIRONMENTS AND CAN BE EASILY WORN ALL DAY LONG** ”

“ **BOLLÉ SAFETY IS RECOGNISED AS THE LEADER IN PROTECTIVE GLASSES** ”

“ **THE ANTI-FOG IS THE MOST EFFECTIVE TESTED AMONG SEVERAL OTHER BRANDS** ”

The 3 characteristics users most appreciate are: **COMFORT - DESIGN - TECHNICITY**

SUPPORTING YOU TO RAISE AWARENESS

AS TECHNICAL EXPERTISE ALONE IS NOT ENOUGH, WE SUPPORT YOU IN PREVENTING RISKS!

Our mission does not stop at designing and producing effective and comfortable eye protection in all situations. Even if the overall number of accidents is dropping, there are still too many. A lot of them could be avoided if all employees protected themselves. Informing and educating to change behaviour is also our concern. To achieve it, we help you in the field.

KEY FIGURES THAT CALL FOR ACTION...

In AUSTRALIA:

■ There were over **100 000** workplace accidents in 2016-2017 involving at least 5 days of sick leave ¹

■ Median compensation paid A\$12,100 ¹

↑ **+34%**
since 2012

■ Median time lost 5.8 weeks ¹

↑ **+11%**
since 2012

■ The most impacted sectors ²

product authenticity and high quality

AS/NZS 1337.1:2010 STANDARD

■ THE REFERENCE STANDARD

AS/NZS 1337.1:2010 Australia/New Zealand standard for personal eye and face protection for occupational applications. The AS/NZS 1337.1:2010 standard specifies minimum requirements for non-prescription eye and face protectors and associated oculars.

Standard AS/NZS 1337.1:2010 also defines the basic characteristics to which all eye protection must conform with regard to: eyewear coverage, optical quality and minimum strength.

While all eye protection must comply with AS/NZS 1337.1:2010, all filters and equipment are also covered by specific standards which must be understood in order to ensure protective equipment is adapted to the activity of its wearer.

The AS/NZS 1337.1:2010 standard applies to all eye protection and guarantees adequate marking and the quality of the equipment. Its purpose is to guarantee protection from:

- Impacts characterised by varying degrees of severity
- Flying particles and fragments
- Dust
- Splashing materials
- Molten metals
- Harmful gases
- Vapours and aerosols
- Or from any combination of these risks.

Bollé Safety designs and markets personal protective equipment for eye protection for industrial use consistent with the AS/NZS 1337.1:2010 standards. Each marking corresponds to a very specific use. All Bollé Safety products are tested at 23°C and 60° C according to AS/NZS 1337.1:2010 standard. Tested by independent laboratories, certified by accredited bodies (BSI, SAI Global and others), this information guarantees protective eyewear quality and resistance.

Bollé Safety strives to develop and provide high quality products with emphasis on health and safety of the customers. All Bollé Safety products are tested and approved to AS/NZS 1337.1:2010 for Medium Impact Protection.

■ LENS MARKINGS

Lens marking must include:

- The manufacturer's name or identification.
- Ocular marking.
- Other appropriate markings.

Impact resistance:

I or F. Medium energy impact, resists a 6 mm, ball at 45 m/s.

V or B. High energy impact, resists a 6 mm, ball at 120 m/s.

Special performance requirements:

- C.** Liquid droplets or splash resistance
- D.** Dust particles
- G.** Gas and fine dust particles
- M.** Molten metal and hot solids

■ FRAME MARKINGS

AS/NZS 1337.1:2010 Product had been tested and approved to Australian standards.

WARNING

- I or F. Maximum protection for glasses and goggles.
- V or B. Maximum protection for face shields.

If the I, F, V and B symbols do not apply to both the lens and frame, then the lowest level must be assigned to the complete protective eyewear.

MAKE THE RIGHT CHOICE

WHAT TYPE OF PROTECTION TO CHOOSE?

FOR EACH RISK, HIGH PERFORMANCE PROTECTION ADAPTED TO YOUR INDUSTRY.

Assessment of occupational risks involves identifying, assessing and ranking risks in the workplace to implement relevant preventive measures.

It is the initial step in Workplace Health and Safety. It is vital to check that the risk identified, the directives of the standard and the markings on the product all match.

PROTECT YOURSELF
FROM **THERMAL RISKS**

TOP PRODUCT
SUPERBLAST

Protection from hot liquids or solids, intense heat radiation,
radiating from furnaces.

Risks or use	Symbol*	Glasses	Goggles / Helmets	Safety face shields	Standard
Splatters of molten metals and hot solids	M or 9*				EN166

The M or 9 symbol must imperatively be indicated on the lens and the frame to guarantee
protection from thermal risks.

PROTECT YOURSELF FROM
CHEMICAL RISKS

TOP PRODUCT
PILOT 2

Protection from toxic dust, aerosols, dangerous
liquids, gases or toxic vapours.

Risks or use	Symbol*	Glasses	Goggles / Helmets	Safety face shields	Standard
Liquid droplets	C or 3*				AS/NZS 1337.1.2010
Liquid splashes	C or 3*				AS/NZS 1337.1.2010
Large dust particles > 5 microns	D or 4*				AS/NZS 1337.1.2010
Gas and fine dust particles < 5 microns	G or 5*				AS/NZS 1337.1.2010

The C, D, G, 3, 4 and 5 symbol or symbols must imperatively be indicated on the lens.
If none of these symbols is indicated in the markings, then the equipment is not suitable for
chemical risks.

PROTECT YOURSELF FROM
ELECTRICAL RISKS

TOP PRODUCT
SPHERE

Protection from live contact and short-circuit
electric arcs.

Risks or use	Symbol*	Glasses	Goggles / Helmets	Safety face shields	Standard
Short-circuit electric arc	8				EN166

The 8 symbol must imperatively be indicated on the lens and the frame to guarantee
protection from electrical risks.

PROTECT YOURSELF FROM
RADIATION RISKS

TOP PRODUCT
MERCURO

Exposure of the eyes to high intensity, ultraviolet, infrared and
visible light sources, welding activities, steelworks, surgery.

Risks or use	Symbol*	Glasses	Goggles / Helmets	Safety face shields	Reference standard
Ultraviolet radiation	2 or 3				AS/NZS 1337.1.2010 & AS/NZS 1338.3.2012
Infrared radiation	4				AS/NZS 1337.1.2010 & AS/NZS 1338.3.2012
Electric welding	EN175 for the hood EN379 for the filter				EN166-169 EN175 EN379
Gas welding	1.7/3/5				AS/NZS 1337.1.2010

The standard is identified on the lens markings.

*Second letter or number is that specified in the EN & proposed ISO standard. Future
revision of the Australia standards will specify this marking where there is currently an
alternative. See the marking in position page 15.

OF THE GLASSES IN THE RANGE ARE MANUFACTURED FROM POLYCARBONATE

- **Ultra strong** (20 times stronger than conventional mineral glass),
- **Ultra light** (20 g on average for a single lens),
- **Ultra thin** (2.2 mm on average).

CHOOSE THE RIGHT LENS FOR YOUR WORK ENVIRONMENT

Glare protection:

Glare is a UV radiation that bounces off reflective surfaces (water, road, etc.) in all directions and then enters the eye. Intense light and glare can alter the vision and reduce eye's visibility. When working outdoors, regardless of the weather conditions, it is important to provide glare protection.

Contrast enhancement:

Contrast is the difference in light between light and dark. Strengthening it makes it possible to better assess the details of our sight in order to be more accurate in more restrictive environments (dark/night for example).

Use the quick search
to find your models
P. 98-99

FOR OUTDOOR USE

POLARIZED

THE END OF GLARE!

- **Improves** colour perception and visual comfort.
- **Improves** perception of contrast and depth.
- **Reduces** eye strain.

Available on the BAXTER, CONTOUR, HUSTLER, HURRICANE, MERCURO, PROWLER, TRYON and VODOO models.

FLASH

- **Protects** from heat.
- Ideal for use **outside in full sunshine**.
- Can be **combined with POLARIZED technology**.

Available on the HURRICANE, HUSTLER, MERCURO, PRISM, PROWLER and TRYON models.

SMOKE OR LIGHT SMOKE

- Outdoor use only.
- Filters UVA and UVB (99.99%).
- Is **compatible with the 'PLATINUM' anti-fog coating**.

TWILIGHT

IDEAL FOR OUTDOOR USE IN LOW LIGHT CONDITIONS

- Recommended for work **outdoors at dawn and dusk**.
- **Improves contrast** in low light.
- **Effectively absorbs blue light (>75%)**.
- Is **compatible with the 'PLATINUM' anti-fog coating**.

Available on the RUSH, RUSH+, RUSH+ SEAL and COBRA models.

FOR INDOOR/OUTDOOR USE

CSP

Comfort Sensivity Perception

THE BEST INDOOR/OUTDOOR COMPROMISE

- Ideal for all activities requiring exposure to **alternating bright and low light**.
- **Adapted** to environments with **extreme temperatures**, both cold and hot.
- **Blue light filtration** and combination with the exclusive 'PLATINUM' **anti-fog coating**.

Available on the BAXTER, CONTOUR, MERCURO, NESS+, RUSH+, RUSH+ SMALL, SILEX+, SILIUM+, TRYON, BACKDRAFT FIRE, PILOT 2 and PILOT 2 FIRE models.

ESP

Extra Sensory Perception

COMBATS GLARE DURING FREQUENT MOVEMENTS

- **1 colour, 2 uses** - indoor & outdoor.
- Provides **good visible transmission** (>60%).
- **Reduces glare and reflection** when moving from a dark area to a lit area.
- **Filters blue light**.

Available on the RUSH+, CONTOUR and CONTOUR METAL models.

YELLOW/AMBER

- **Recommended for low light environments**, both indoors and outdoors.
- **Increases contrast** (ideal for night driving for example).
- **Filters blue light**.

Available on the BANDIDO, CONTOUR, PRISM, RUSH and SILEX models.

FOR INDOOR USE

CONTRAST

FOR BETTER INDOOR WORKING COMFORT

- **Combats the aggression** of artificial lighting.
- **Reduces eye fatigue** providing optimum working comfort and improving contrast and relief.
- **Ideal for activity at a static workstation using neons, halogens or other sources of blue light** that can affect the eyes.

Available on the RUSH+ model.

CLEAR

INDOOR USE

- Safety glasses with clear lenses are essential **indoors**.
- Bollé Safety clear lenses provide **90% light transmission**.
- Is **compatible with the 'PLATINUM' anti-fog coating**.

OPTICAL REMINDER BLUE LIGHT

BLUE LIGHT: A POTENTIAL RISK FOR YOUR EYES

In an indoor (or indoor/outdoor) working environment, it is important to define your accuracy requirements for your professional tasks and assess your blue light exposure risks. The higher the visible light transmission percentage (the light you see with the naked eye), the more the lens will transmit a high percentage of that light. **Therefore, the closer the transmission is to 100%, the closer we are to visible light without wearing glasses, which favours vision accuracy.**

Computer screens and LED lighting emit blue-enriched light which can have physiological effects (such as sleeping disorders) and can damage the retina. **Therefore, it is important to choose** lenses that provide high protection from blue light for professionals subjected to intense artificial lighting and for those who spend many hours in front of a screen.

The risks associated with blue light

- Aggravates age-related macular degeneration (ARMD).
- Glare and visual discomfort (blurred vision).
- Strobe effect linked to the gradual fluctuating intensity of the light.
- Headaches.

PLATINUM®

AN EXCLUSIVITY FROM BOLLÉ SAFETY

ANTI-SCRATCH AND ANTI-FOG COATING:

PLATINUM®

THE OPTIMUM PROTECTION

At Bollé Safety, we are convinced that scratches and fog do not only appear on specific surfaces...

This is why we permanently apply the anti-scratch AND anti-fog coating to each lens surface (inside AND outside).

This dipping process offers protection which is twice as efficient and considerably slows the appearance of fog and scratches.

FLEX 160°

The FLEX 160° technology allows for perfect adjustment regardless of face size.

The built-in spring hinge technology allows for very flexible temples to adapt to different head sizes, without compromising optical quality.

FLEX

Flex technology provides unique flexibility.

Flexible and fully malleable, the FLEX bridge can be adjusted in all directions and fits all face shapes perfectly thanks to its shape-memory material.

PIVOTING TEMPLES / TILTING FRONT

This technology helps to adapt the angle of the glasses for better protection.

ADJUSTABLE BRIDGE

Designed to adapt to the nose so the frame sits perfectly on the face.

NEW

ASIAN FIT

Because every face is unique and because comfort and safety remain our top priority.

Bollé Safety has specially designed and developed frames for wider and higher cheekbones, as well as lower and flatter nose bridge.

SMALL FACES

Glasses adapted to narrow faces.

OUR COLLECTIONS

CUSTOMISED MODELS

CUSTOMISE THE EYEWEAR OF YOUR CHOICE* AND BENEFIT FROM THE EXPERTISE AND QUALITY OF BOLLÉ SAFETY!

Bollé Safety continues to innovate by offering the unique co-branding service. Thanks to this program and our commitment to push our limits to satisfy your needs, you benefit from an innovative service and manufacturing quality beyond any reproach.

BOLLÉ SAFETY EXCLUSIVITY

You can choose to have your brand markings on the lens, temple arm or the case (if the product is delivered with a case).

Exclusive: online customisation module

- Bollé Safety innovates and offers a new exclusive digital service.
- A unique live experience!
- Available 24*7.

**CHECK OUT
THE FULL OFFER IN
THE CO-BRANDING
BROCHURE.**

4 GOOD REASONS TO CHOOSE BOLLÉ SAFETY CO-BRANDING FOR YOUR EYE PROTECTION

Complete customisation

We create a product in your image: lens markings, temple markings comma temple colours, **NO LIMITS on creation!**

Your brand is visible

No matter the industry, your employees will convey the identity of **your brand and raise greater** awareness of your organisation.

You have a unique eyewear

If you wish to place a new order: it's easy, just send us your specific reference and we will start production!

Offer your employees glasses they feel like wearing

Because the look is essential and because it's easier to adopt products in your image, your employees will be **proud to wear their ultra-personalised glasses!**

NEW

Co-branding is also available for some goggle models

GLASSES

Bollé Safety is always innovating to bring you more performance. Our complete range of glasses is designed to adapt to all working environments while providing style, comfort, lightness and modularity for optimum protection.

HOW TO CARE FOR AND CLEAN YOUR EYE PROTECTION ?

DO's

You must rinse the glasses under cold water to remove any dust

Clean the lenses softly with our **b CLEAN** cleansing solutions or pre-moistened wipes

Use a clean microfibre soft cloth to dry the lenses

Always carry and store your glasses in a protective case/pouch

Glasses that are scratched or whose frame is damaged must be replaced

DON'Ts

Never use hot water which can alter/damage the coatings (anti-reflective, anti-fog...)

Never use your clothes, fingers or general purpose tissues to clean lenses

Do not clean with any solvent or alcohol based cleaning product

Do not place your glasses with the lenses facing down

ACCESSORIES

To protect and take proper care of your spectacles, goggles or face shields, Bollé Safety has designed a complete range of practical and effective accessories.

CLEANING PRODUCTS

The B-Clean Bollé Safety range of cleaning solutions guarantees optimum cleaning. Alcohol and silicone free, its water-based formula guarantees a perfect cleaning and protection for your glasses and goggles
