

KingGee

Comfort is King

ESTABLISHED IN SYDNEY BY MR ROBERT ADCOCK, KINGGEE HAS BEEN PART OF AUSTRALIAN HISTORY SINCE 1926. THE ORIGINAL KINGGEE OVERALL WAS BORN OUT OF HUMBLE BEGINNINGS AND WAS THE FIRST IN A LONG LINE OF WORK GARMENTS KNOWN FOR THEIR QUALITY AND CAREFUL CRAFTSMANSHIP.

OVER THE YEARS, KINGGEE HAS EVOLVED WITH THE CHANGING NEEDS OF THE WORK ENVIRONMENT. TODAY, OUR PASSION AND EXPERTISE ARE SECOND TO NONE.

OUR PREMIUM PRODUCTS ARE ENGINEERED TO ENSURE COMFORT, DURABILITY AND FUNCTIONALITY ENABLING YOU TO WORK AT YOUR BEST IN ALL CONDITIONS. WE LEAD THE INDUSTRIAL WORKWEAR INDUSTRY AND PUSH THE BOUNDARIES OF GARMENT DEVELOPMENT TO NEW LEVELS. WORKCOOL HYPERFREEZE AND THE NEW TRADIES UTILITY RANGE ARE JUST TWO OF OUR LATEST INNOVATIONS.

WE HAVE COME A LONG WAY SINCE OUR FIRST KINGGEE OVERALL. SOME THINGS NEVER CHANGE — WE ARE PROUD OF OUR PRODUCT. WE ARE PROUD OF OUR CUSTOMER. WE BELIEVE IN COMFORT. COMFORT IS QUALITY. QUALITY IS KING. COMFORT FOR KINGS.

MADE
FOR
KINGS

THE KINGGEE WORKINGS

AIRFLOW

Engineered ventilation placed in high heat zones to allow air to flow through to the body, improving breathability and keeping the wearer cool and comfortable.

MESH VENT

Mesh venting in high heat zones improving breathability and keeping the wearer cool and comfortable.

TRIPLE STITCHING

Triple stitching providing increased strength and durability in key stress points.

ANTIMICROBIAL

Antimicrobial finish has been applied to the fabric to minimise odours and inhibit the growth of bacteria, keeping you smelling fresher for longer!

MOISTURE MANAGEMENT

Fabrics designed to keep you dry and comfortable: moisture wicking, quick drying and breathable.

UPF RATING

An Ultraviolet Protection Factor (UPF) rating for Ultraviolet Radiation transmitted through a fabric onto the skin. Look for garments with a UPF 50+ rating to be assured of excellent protection. These garments have been designed to comply with AS/NZS 4399:2017.

ARTICULATED FIT

Engineered to fit and move with you.

RIPSTOP FABRIC

Ripstop fabrics have been woven to be highly tear and rip resistant.

WATER RESISTANT

Garments constructed using highly water resistant fabrics. Not waterproof due to garment seams not being sealed.

DURABLE WATER REPELLENT

Durable water repellent finish sheds water from the garments surface.

REFLECTEC

Material that uses millions of reflective glass beads to reflect light back towards its original source for increased visibility and safety in low light situations.

WATERPROOF

Garments constructed with waterproof fabrics and have been seam sealed to prevent water penetrating the inside of the garment.

HIGH VISIBILITY

This symbol indicates which garments have been designed to comply with AS/NZS 4602.1:2011. These garments give you confidence that you will be visible at work.

CTE3 REINFORCED

CTE3 reinforcement fabric has been added to the garment at critical areas for durability.

WIND RESISTANT

Garments constructed using highly wind resistant fabrics. Not windproof due to garment seams not being sealed.

LIGHTWEIGHT

Lightweight fabrics that do not compromise strength or durability.

STRETCH

Built-in stretch providing comfort and freedom of movement

WINDPROOF

Garments constructed with fabric that has a windproof membrane and have been seam sealed to prevent wind penetrating the inside of the garment.

KNEE PAD POCKETS

Provision to hold knee pads in place.

TECHNOTEX

Water, oil and soil repellent finish, helping you stay dry and clean and keeps fabrics and colours looking new for longer.

WRINKLE RESISTANT

Durable fabric finish that reduces the garments tendency to crease, making it easy to care for.

PANTS THAT FIT

WORKCOOL PRO

BIO MOTION PANT

K53016

Workcool Pro Bio Motion Pant

Fabric: 98% Cotton, 2% Elastane Ripstop 237gsm

Sizes: 67R–112R, 92S–132S

Colours: Navy (NAV)

Comfort stretch waistband with gel grip print
 Stretch ripstop fabric for improved movement and durability
 Crotch gusset for improved movement
 Behind the knee cooling vents
 Segmented 50mm RelfecTEC tape – Bio Motion
 Bio Motion tape configuration
 Straight fit pant

PANTS

K53820

Workcool 2 Reflective Pants

Fabric: Cotton Ripstop 235gsm
Sizes: 77R–112R, 92S–132S
Colours: Navy (NAV)

Behind the knee cooling vents
Ten multifunctional pockets
50mm ReflectTEC tape
Extra reinforcing with triple stitching
Reinforced centre front button for durability
Straight fit pant

K43825

Women's Workcool 2 Reflective Pants

Fabric: Cotton Ripstop 235gsm
Sizes: 6–24
Colours: Navy (NAV)

Behind the knee cooling vents
Ten multifunctional pockets
50mm ReflectTEC tape
Extra reinforcing with triple stitching
Reinforced centre front button for durability
Straight fit pant

K53800

Workcool 1 Reflective Pants

Fabric: Cotton Drill 290gsm
Sizes: 77R–112R, 92S–132S
Colours: Navy (NAV)

Ten multifunctional pockets
Extra reinforcing with triple stitching
50mm ReflectTEC tape
Discreet cooling vents
Straight fit pant

K53020

Reflective Drill Pants

Fabric: Cotton Drill, 310gsm

Sizes: 77R–112R, 79L–94L, 87–137S

Colours: Navy (NAV)

Single pleat trousers
Wide opening side pockets with Fob pocket
Twin back welt pockets
Smart phone welt pocket at back
50mm ReflectTEC tape
Reinforced stitching at stress points
Straight fit pant

K53018

Basic Stretch Bio Motion Cargo Pant

Fabric: 98% Cotton, 2% Elastane, 270gsm

Sizes: 67R–112R, 92S–132S

Colours: Navy (NAV)

Durable, breathable

Relieves pain from working and standing on hard surfaces and rugged worksites

ICON GUIDE

APODA ENDORSED

KingGee Footwear and APODA are working together to deliver improved comfort and foot health for all of our end users. Footwear showing this logo have been tried, tested and recommended by experts.

DUAL DENSITY PU/TPU OUTSOLE

Polyurethane (PU) provides an excellent balance of shock absorption (cushioning) and energy return (rebound). Thermoplastic Polyurethane (TPU) has many useful properties including elasticity and resistance to most oil, grease and abrasion, as well as 130° Celsius heat resistance.

MET GUARD

Poron™ XRD™ Extreme Impact Protection material is a breakthrough technology. Extreme impact protection from a moulded pad stretching from the tongue to the steel cap. Contoured, breathable and flexible allowing ease of motion for comfort & fit whilst protecting the metatarsal. Tested in accordance to ASTM F 2413-11.

ACHILLES FLEX

Accordion-style flex point in the Achilles area allows the boot to flex. It's unique design allows the foot to flex forward when crouching and backward when changing gears in a car/truck preventing any pain and restriction in movement from the Achilles tendon.

ELECTRICAL HAZARD EH

Electrical hazard footwear is specifically designed and tested to insulate the wearer from electrical hazards, to reduce the flow of electricity. EH Footwear has been tested to the requirements of ASTM F2413-11. EH shoes should not be used as the primary source of protection in an electrical hazard environment.

OIL & SLIP RESISTANT

Sole resistant to fuel oil and rated to SRA slip resistance which is tested using water on ceramic tile.

AIRPORT FRIENDLY

Airport friendly boots feature non-metallic components. Plastic shanks are used in manufacture together with the use of a composite safety cap ensure KingGee footwear meets AS/NZS 2210.3:2009 safety standards.

GENUINE LEATHER

KingGee boots are made using the finest quality leathers that mould to the shape of your feet allowing your feet to "breathe".

ORGANIC FAT AND OIL RESISTANT

Sole resistant to organic fats and oils.

ANTI-STATIC

Boots with Anti-Static properties are designed to reduce the build up of excess static electricity by conducting body charge to the ground. This offers a level of protection against ignition hazards such as flammable materials and gasses.

HAND MADE

This shoe is made by hand using quality materials and time-honoured traditional shoe making skills.

PROTECTIVE TPU TOE BUMPER

Protective Thermoplastic Polyurethane (TPU) toe and heel bumpers provide further abrasion resistance.

ARZ+™ PAD TECHNOLOGY

Anatomical Rebound Zone (ARZ+) with an expandable polymer that provides excellent cushioning and rebound. ARZ+ heel protection difference is apparent at heel strike the soft contouring material dissipates force upon impact.

LIGHTWEIGHT

KingGee footwear incorporate safety toe caps in a contemporary yet durable design which feels lightweight on the wearer's foot.

RUBBER OUTSOLE

Rubber offers 300° Celsius (572°F) heat resistance. Rubber has excellent resistance to oils, acids and is naturally resistant to hydrolysis.

COMPOSITE TOE CAP

Composite safety toe caps provide the same level of protection as that afforded by steel toe caps tested under AS/NZS 2210.3:2009 (200 Joules) standards, with the added benefit of being non-conductive and are up to 30% lighter than a steel toe cap.

MEMORY FOAM FOOTBED

Sensitive to pressure and moulds perfectly around the contours of your foot. The PU bottom layer provides permanent cushioning and shock absorption.

STEEL CAP

Designed to withstand a force of 200J (Joules) and compression resistance of 1.5 ton. Ethylene Vinyl Acetate (EVA) protective cap liner for added comfort and steel cap protective liner to ensure toes are comfortable and not in contact with the protective safety cap.

SRC SLIP RESISTANCE

SRC offers the most superior slip resistance for all surfaces. (Tested on both ceramic tile floor with SLS solution and steel floor with glycerol).

AGION®

Agion® branded antimicrobial technology makes products cleaner and longer lasting with silver, copper and zinc, which have been proven in use throughout history. Agion® anti-microbial technology provides built in protection by working 24/7 resisting the growth of microbes.

KEVLAR®

DuPont™ Kevlar® aramid fibre is used due it being lightweight, heat resistant and extraordinarily strong, with 5 times the strength of steel on an equal-weight basis. It is about 2.5 times stronger than nylon and polyester, has almost no stretch, does not melt, and decomposes at 800°F.

WATER RESISTANT

Water resistant footwear will repel water so that it soaks in more slowly and are best used when walking through dew or occasionally damp areas.

BOA®

The Boa® Fit System is comprised of three integral parts: a micro-adjustable dial, super-strong lightweight laces, and low friction lace guides. Each configuration is engineered to optimize fit and provide precision, adaptability and control.

OUTLAST®

Outlast® technology, originally developed for NASA, utilizes phase change materials (PCM) that absorb, store and release heat for optimal thermal comfort. Outlast® technology will proactively manage heat while controlling the production of moisture before it begins. That's the Outlast® difference.

WELLMAX® PUNCTURE PROTECTION

WELLMAX® anti-penetration is a non-metallic, flexible plate Tested and compliant with EN ISO 20345, EN12568 and CSA Z195-02 Standards. The high tech ceramic coated fibres offer greater comfort, lightness, thermal insulating properties and flexibility compared to steel plates.

BENCHMARK®

All KingGee footwear showing this logo is certified to AS/NZS 2210.3:2009 meeting all Benchmark® requirements under the Australian and New Zealand standards.

PORON™ XRD™

Extreme impact protection pad is durable, lightweight and comfortable. Poron™ XRD™ is designed to withstand multiple hits over time and not break down.

WIDE SAFETY TOE CAP

Wide profile toe cap provides more comfort. All our footwear complies with Australian and New Zealand Standards AS/NZS 2210.3:2009.

COSMO™

- Highly abrasion resistant lining
- Keeps you dry and comfortable
- Quick drying hi-tech

YKK®

World leader in the manufacture of fastening systems. YKK® Coil zipper is extremely strong and lightweight, has excellent heat resistance (up to 360°F/ 182°C) and resistance to cold (down to -60°F/ -51°C). Resistance to chemicals further extends the use of YKK® beyond the scope of conventional metal zippers.

30 DAY COMFORT GUARANTEE

Our workboots have been engineered to provide maximum comfort. After careful study of the Australian foot anatomy we have designed KingGee boots with a wider last, sole & toe cap. We are so confident you will love these boots that they come with a 30 day comfort guarantee.

DRI-LEX® LINING

Dri-Lex® lining treated with Aegis® anti-microbial. A patented superior mesh designed to manage moisture within a boot environment.

- Wicks away moisture
- Allows your feet to breathe
- Keeps your feet dry
- Keeps your feet cool

FOOTWEAR

BUILT TO FIT FOOTWEAR

- 1

WIDE STEEL TOE CAP

For protection & comfort
- 2

DRI-LEX™ LINING WITH AEGIS™ ANTI-MICROBIAL

Keeps your feet cool and dry
- 3

LIGHTWEIGHT SOFT PU

For long-term comfort
- 4

ARZ+™ TECHNOLOGY INC. PORON™ XRD™ PAD

Provides superior shock absorption
- 5

RECYCLED WOVEN FABRIC

For insulation
- 6

PU MIDSOLE

For maximum cushioning
- 7

TPU OUTERSOLE

Provides fuel oil, heat (up to 130°C) and slip resistance

BUILT TO FIT STORY

3D-SCANNING

A last gives the volume inside a boot and therefore is essential for comfort and fit. Ours has been designed by one of Australia's most experienced last-makers. For over 35 years he has been measuring and recording Australian foot dimensions. The use of 3D scanning, his extensive database and expertise have all been instrumental in providing KingGee with a last that best fits the Australian foot.

DRI-LEX™ LINING

A superior mesh, designed to manage moisture within a boot environment. It keeps the foot surface dry and comfortable no matter the climate. The hydrophilic action in Dri-Lex™ fabrics works through a combination of absorption, wicking and rapid drying capabilities. This lining is also treated with Aegis™ anti-microbial to reduce odour formation caused by bacteria.

DRI-LEX®

BOOT SAFETY STANDARDS

AUSTRALIAN AND NEW ZEALAND SAFETY STANDARD – AS/NZS 2210.3:2009

Every safety boot sold in Australia has to pass the latest Australia and New Zealand Standards for protective and occupational footwear (currently AS/NZS 2210.3:2009).

Each style must be tested by an independent and authorised laboratory and then certified by a worldwide recognised organisation where each component of the boot is tested (fabric, sole, thread, lining, etc.).

BONDING TEST

Measures the force required to separate the upper from the sole unit or to separate different layers within the sole unit, i.e. separate midsole from outsole. Material tearing is part of the assessment when the force required to tear the material itself apart is lower than the bonding strength between two different materials and also lower than the bonding requirement then material failure will occur.

COMPRESSION TEST

This test measures the resistance of a toe cap being compressed by an upper plate with a pressing force $15\text{kN} = 1.5\text{ton}$. The clearance between the toes and the toe cap must be over 12.5mm or 15mm depending on sizes.

IMPACT TEST

Each toe cap has to pass the impact resistance test explained in the standard AS/NZS 2210.3:2009. After the drop of a 20kg striker with a force of 200J, the clearance between your toes and the toe cap must be between 12.5mm to 15mm depending on sizes.

QUALITY LEATHERS

Our KingGee boots are made with attention to detail using the finest quality leathers that mould to the shape of your feet allows your feet to “breathe”.

Leather is a natural material that is made from animal hide that has been tanned. It is among the oldest of human inventions. In ancient times, the gatherers and hunters used leather as their protective clothing and for warmth.

KingGee cowhide leather is flexible, breathable and supple. Cowhide leather looks good dyed or left natural. It's durable, ages well and lasts up to five times longer than fabric. Its properties of toughness and tear and puncture resistance are the reason it is used in our boots. It naturally repels moisture, retains its shape, and resists sun and heat damage.

FULL-GRAIN LEATHER

KingGee full-grain leather workboots use cow hides which are not sanded or buffed, and are naturally tanned resulting in the hides having excellent breathability and a true softness in the leather.

Owing to the fact that this type of leather is not sanded, the natural marks on the hide are sometimes visible. Most people prefer this natural finish.

KingGee full-grain leather is very reliable and strong. This is because the grain has not been removed. Thus the fibre strength and the toughness of the hide are still retained in the leather. Full-grain leather does not wear out; instead a patina will be developed over time. Full-grain leather also has better breathability than other types of leather. Owing to the strength of this type of leather, it is used in the production of KingGee workboots.

SUEDE LEATHER

KingGee suede leathers are sanded to produce the velvet-soft feel that is typical of high-grade suede. This feel is achieved by sanding the inner layer of the cow hide.

Because it comes from a thinner piece of hide, suede is less durable than full-grain leather. The suede texture of the material also makes it more susceptible to damage from water and stains. However, because several pieces of suede can be produced from a single hide, it is less expensive than full-grain leather.

NUBUCK LEATHER

KingGee Nubuck leather has a soft, velvety surface and is the premium choice in leather. Nubuck is sanded on the outer surface of the leather, essentially the part that would have been the exterior skin of the animal.

Since the outside layer of a skin is much tougher, Nubuck lasts much longer than suedes and responds very well to this sanding process. It does show imperfections in the exterior layer of the skin much more easily, and is often treated with dyes, sometimes simply clear ones, to disguise any significant flaws.

Nubuck is subject to easy staining and often requires pre-treatment or stain-resistance protection to extend its life.

CRAZY HORSE LEATHER

Crazy Horse Leather is sometimes known as “saddle leather” and is treated with oil and wax in a unique tanning process to the surface of the leather. During this process, the oil and wax surface to create a rich, beautiful patina that's fade-resistant. When the leather is rubbed, the colour will change and will not immediately reverse, giving it an antique look.

FOOTWEAR

HOW TO WORK OUT YOUR SHOE SIZE

MEN'S <small>EEE fit</small>																		
AUS/UK	5	5.5	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	12	13	14	15	16

The grey shaded boxes show the Men's to Women's equivalent sizes for unisex sized footwear. For example, a Men's AUS/UK 5 is equivalent to a Women's AUS/USA 7.

Please Note: Unisex sizes are wider fits for women than women's specific footwear.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

SIZE GUIDE

HOW TO WORK OUT YOUR SIZE

MEN'S MEASUREMENTS STANDARDS

A / NECK

Measure around your neck at the collar level. Remember to make allowance for comfort (usually 2 fingers behind the tape).

B / CHEST

It is important to stand naturally, keeping the tape level and straight. A firm (not tight) chest measurement should be taken.

C / WAIST

Measure around natural waistline, keeping the tape level and straight. Do not measure over your trousers.

D / INSIDE LEG

Take the measurement from the crotch to the top of the heel of the shoe.

WOMEN'S MEASUREMENTS STANDARDS

A / BUST

Measure around the body across the fullest part of the bust, keeping the tape level and straight.

B / NATURAL WAIST

Measure around the smallest part or your natural waistline, keeping the tape level and straight. Do not measure over your trousers.

C / LOW WAIST

Measure at a level approximately 4cm down from the natural waistline, keeping the tape level and straight. Do not measure over your trousers.

D / HIPS

Measure around the widest part of your hips (approximately 20-30 cm below the waist). In this position the tape measure should slide up, down and over the bottom.

COMPLIANCE GUIDE

HIGH VISIBILITY GUIDE

HIGH VISIBILITY DAY

K54870 Workcool 2
Spliced Shirt Long Sleeve

HIGH VISIBILITY NIGHT

K54880 Workcool 2 Hi Vis Reflective
Spliced Shirt Long Sleeve

KingGee high visibility workwear meets or exceeds Australian and New Zealand Standards AS/NZS 4602.1.

According to the Australian Standards, materials classified as high visibility for daytime use must be manufactured from a durable fabric of woven or knitted cotton or equivalent man-made fibre that contains a fluorescent pigment or other high visibility dye. These materials are subjected to the following tests and must meet or exceed specified minimum requirements for:

- Daylight colour and luminance factor
- Colour fastness to light
- Colour fastness to washing
- Colour fastness to perspiration

In some cases, for safety reasons, a garment must be made from a natural fibre incapable of retaining a fluorescent colour. In these instances, the material is tested for luminance for non-fluorescent materials. Alternatively, man-made fibres are generally capable of retaining a fluorescent colour and are therefore tested for luminance for fluorescent materials. The fabrics used in the manufacture of KingGee high visibility workwear are tested and must meet or exceed specified minimum requirements for:

- Chromaticity
- Luminance for fluorescent materials or
- Luminance for non-fluorescent materials

Things to know about high visibility standards:

- Class D means the garments meets AS/NZS 4602.1 for daytime use only.
- Class N means the garments meets AS/NZS 4602.1 for night time use only.
- Class D/N means the garments meets AS/NZS 4602.1 for day or night time use.
- Bottoms (pants and shorts) are not part of the high visibility standards and therefore do not comply with AS/NZS 4602.1.

IMPORTANT: LIMITATIONS OF USE.

Under no circumstances should Class D garments be worn for visibility purposes at night. Any markings, attachments, screen prints or other alterations, accessories or coverings not incorporated into the original product may not only void the garment compliance with the appropriate standard, they may also put the user at risk by reducing the high visibility area of the garment. The high visibility properties offered by KingGee high visibility may be lessened due to normal wear over time. KingGee high visibility garments using natural fibres have been tested and comply to Australian Standards AS/NZS 4602.1 in dry conditions. Wet conditions may alter the compliance of these fabrics to the standard and appropriate care should be taken.

UPF RATINGS

Garments are classified based on the ultraviolet protection factor (UPF). The UV protection of fabric depends on the content, weave, density and colour. UPF rates how effectively a piece of clothing shields against the sun. It is based on the content, weight, colour of the fabric and indicates how much UV can penetrate the fabric. For instance, a shirt with a UPF of 50 allows just 1/50th of the sun's UV radiation to reach your skin.

The UPF rating is for the fabric and does not address the amount of protection which is afforded by the design of the article. The manipulation involved in garment manufacture such as stretching and sewing may lower the UPF of the material. Articles which have been designed to cover the maximum area of the body are recommended.

The protection offered by garments may be lessened:

1. at points where the fabric is in close contact with the skin such as across the shoulders;
2. if the fabric is stretched;
3. if the fabric is wet; and
4. with time, due to the effects of normal wear. Fabric has been rated in accordance to AS/NZS 4399:1996.

OUR QUALITY POLICY

We understand work can be demanding and stressing at times. KingGee garments are designed to facilitate your everyday.

Our Design and Quality departments spends a lot of effort to make sure KingGee products are comfortable, functional and presentable for as long as possible.

- All fabrics are systematically tested by a third party laboratory for tear force, breaking force and colour fastness.
- All shades are carefully controlled in a light box to ensure the consistency of your uniforms.
- All new products introduced in the market place are wear tested with real workers prior to the launch.
- All marketing claims are systematically tested and part of the product specifications.

KingGee, a brand under The Workwear Group, continuously review standards and trends within the industry and are constantly pushing the boundaries so that customers are getting quality products that are both safe and fashionable. Quality is paramount in KingGee and we will never sacrifice it. KingGee products comply with:

- High Visibility Australian Standards Compliant AS/NZS 1906.4 & AS/NZS 4602.1
- UPF Australian Standard AS/NZS 4399:1996
- Boots – Safety Footwear Standard AS/NZS 2210.3C & AS/NZS 2210.3:2009

The Workwear Group, who owns KingGee, achieves the highest workplace standards. Australian Standards Compliance AS/NZS ISO 9001:2015 Quality Management System

ISO 9001 – QUALITY MANAGEMENT SYSTEMS

ISO 9001 is a quality management system (QMS) standard that requires an organisation to meet its own requirements and those of its customers and regulators. It is based on the plan-do-check-act methodology, which helps organisations establish, implement, monitor and measure their processes to deliver results that align with the organisation's requirements and continually improve performance by taking appropriate action.

ETHICAL BUSINESS PRACTICES

KingGee is committed to a fair go for all and we actively manage our business and suppliers to ensure that textile workers are not exploited. We adhere to the Homeworkers Code of Practice in Australia and the Code of Practice for Overseas Manufacturers and Suppliers. These Codes cover labour, wages, work and safety standards for KingGee products that are produced both locally and beyond our home shores.

ETHICAL COMPLIANCE

KingGee, as a brand under The Workwear Group and a division of Wesfarmers Industrials Group, is a recognized leader in managing design, development and supply chains globally, as such we are committed to working with our supply partners to continuously improve ethical business practices through engaging with the partners to deliver sustainable solutions.

We proactively promote responsible behaviour in our supply chain to protect our brands and the well-being of workers/their communities in the factories we work with.

We hold our suppliers accountable in a range of areas including safety practices, legal compliance, labour and human rights, modern slavery, anti-bribery and environmental impact. Our mission is to know, trust and support our supply partners to make our impact on global supply chains positive.
